CHANGING THE WAY YOU WORK.

The 'Clover' electrically - adjustable workstation has been developed to assist you to move seamlessly from sit to stand, and allow your workflow to continue without interruption. The Clover is available in 3 fixture and 5 monitor configurations.

Posture Balance™ Desk Control Software

The Posture Balance™ Desk Control is a software that reminds you to stand up. With a mouse click, it enables you either to count the time/minutes or the calories burnt while standing. This way, the end-user of the desk can set up his/her personal goals, which will increase their motivation and use of the height adjustable desk. The software encourages you to implement movement into your workday.

PIEZO™ anti-collision mechanism

The built-in PIEZO™ sensor feels for any obstruction when raising or lowering the desk, then halts and reverses to avoid collision. The sensor is completely integrated in the column with no visible changes and no extra mounting.

clover - free-standing, single monitor as shown above.
clamp fit & free-stand fixtures are limited to selected models. full range available online.
